

# Protect Your Data, Secure Your Business

Ransomware attacks, security vulnerabilities, and non-compliance issues are significant threats that require proactive measures to ensure data protection and security.

## #1 BACKUP SOLUTION FOR SMBS, ENTERPRISES AND MSPS

FAST

**2X**

Faster backup. Instant recovery for anything. Only 2 minutes to deploy.

AFFORDABLE

**49%**

Lower TCO, from **\$2.45 workload/month** or use indefinitely from \$229/socket.

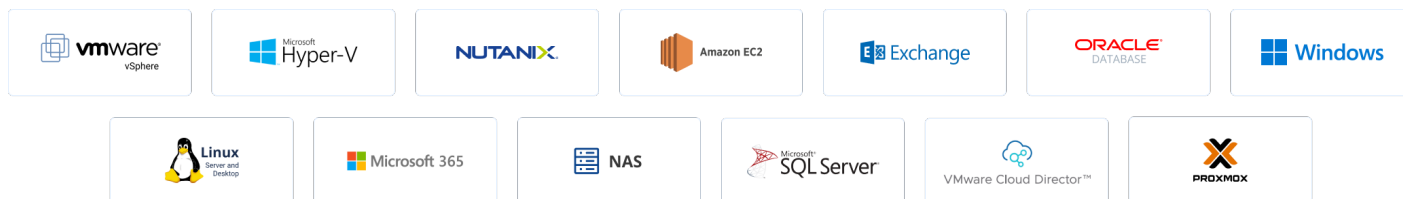

TOP-RATED

**4.8**

Average rating on top IT communities for exceptional user experience and functionality.

## DATA PROTECTION SOFTWARE FOR ALL WORKLOADS

NAKIVO Backup & Replication is a comprehensive data protection solution for backup, replication, granular restore, and disaster recovery of virtual, physical, cloud, NAS and SaaS environments from a single pane of glass.

## 29,000+ BUSINESSES TRUST NAKIVO

NAKIVO Backup & Replication saved our IT team nearly 90% of the time we spent on data protection versus our previous solution.

David Gamidadze, System and Network Administrator, SILK BANK

We can now back up all our VMs, both the high IO ones (because the higher backup speed reduces the time it takes for a backup to complete) and the large archive nodes.

Simon Woodhead, CEO, Simwood

We are now able to complete a full backup for 100 virtual machines in 12 hours and recover backup data within just a few hours.

Jie Yang, System Engineer of Network Technology Team, Oriental Institute of Technology

## YOU'RE IN GOOD COMPANY

### Backup

Fast backup for all workloads (VMware, Hyper-V, Nutanix AHV, Proxmox VE, Amazon EC2, Windows, Linux, NAS, Microsoft 365, Oracle Database). Hybrid storage across local, cloud, S3-compatible platforms, tape, and deduplication appliances.

### Instant Recovery

A variety of full and granular recovery options for different scenarios to mitigate downtime and data loss, including instant VM recovery, granular recovery, full VM recovery, P2V/V2V, VM recovery from Tape, failover/failback of VMs and more.

### Ransomware Protection

for virtual, physical, cloud, NAS and Microsoft 365 data via immutable storage, air-gapped backups, backup tiering, encryption, malware scan and more.

### Disaster Recovery

Instantaneously replicate data of VMware VMs with RPOs as low as 1 second. Run automated DR sequences for failover and failback across diverse scenarios.

## 1 IT Monitoring

Comprehensive visibility, performance optimization, and proactive issue resolution with custom alerts and comprehensive reports for VMware vSphere virtual infrastructure.

## 2 BaaS and DaaS

Managed Service Providers (MSPs) can deliver backup as a service (BaaS), disaster recovery as a service (DaaS), and other data protection services through the comprehensive MSP Console.

## 3 Flexible Deployment

Seamless installation on Windows and Linux, as a VMware or Nutanix VA or as an AWS AMI, and on NAS devices to create a versatile 5-in-1 backup appliance.

## 4 Outstanding Performance

Up to 2x faster backup, replication, and recovery speeds and 50% reduced network load with native change tracking, network acceleration, and more.

## 5 Superior Support

Reliable and responsive support service with an impressive 98% satisfaction rate through chat, email, and phone, along with 24/7 technical and sales assistance.
